Note:

1. The list comprises of water bodies mapped as polygon feature from Google Earth images using forest demarcation line digitized from Survey of India topographical map sheets and human wisdom wherever, the demarcation line is hanging due to gaps
2. The list does not include lakes / wetlands managed by JK LCMA, WUCMA and Wildlife Protection Department and manmade reservoirs constructed and managed for drinking water supply.
3. The list comprises of water bodies/wetlands identified on both SOI toposheets as well as Google image.
4. The list does not include 64 water bodies which are either missing on Sol toposheets or on image or toposheets are not available and which can be included only after due scrutiny by concerned field agency in terms of definitions of wetlands in the Wetland Rules, 2017
5. The list does not include small water bodies with square/rectangular extents with concrete periphery on Google image that appear to be manmade Tanks keeping in view the definition of wetland as per Wetland Rules, 2017.
6. Those Water bodies which are having regular square or rectangular shape with concrete surrounds appears to be 'Artificial' while as those with irregular shape with aquatic vegetation appear to be 'natural'
7. This list is subject to minor changes in future updations owing to possible obscurity of some high altitudinal water bodies under the cover of snow on current Google images or any geo-environmental land cover changes in future or refinement of forest demarcation line using high tech gadgets on ground in future or due to inclusion of any water body out of the 64 unverified water bodies listed for ground verification and scrutiny by concerned district agency in terms of Wetland Rules, 2017.
